

Alignment Criteria

Grain pattern alignment between the door and transom, even when cut from the same panel, will vary to some extent. This is due to the natural progression of the annual rings which create the figure in the wood. Misalignment will be more apparent in doors veneered with open grain species than with close grain.

Misalignment of up to 9 mm [³/₈"] is permitted in every Grade.

End Match

End Match - Figure 1300-15

A single piece of veneer extends from the bottom to the top of the door with a mirror image at the transom.

No Match

No Match - Figure 1300-16

Used only in Economy Grade doors.
