Re: CARB Compliance

Dear Valued Customer,

In 2008 the California Air Resource Board (CARB) mandated a reduction and restriction of formaldehyde emissions that seep into the air from the resin or glue most commonly used to bond plywood, particleboard and medium density fiberboard.

All Haley products sold, manufactured for sale in California that contain hardwood plywood, particle board, medium density fiberboard and thin medium density fiberboard, and engineered wood products meet emissions limits specified in California Code of Regulations, Title 17, 93120.2.

The purpose of this letter is to confirm that all products manufactured by Haley comply with the CARB regulation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kiki Rodriguez', followed by a horizontal line.
