

September 30, 2016

Dear Valued Customer,

Our FSC Chain of Custody number is TT-CC-004296.

FSC mix is 79.3% and FSC/NAUF (No Added Urea Formaldehyde) will be listed on the order/invoice accordingly.

(Non-FSC/NAUF product will be input on a separate order.)

We buy special core and veneer to achieve this. Cut stock (non-FSC virgin wood) and PVA glue (to adhere the veneer to the core with NAUF) make up the remaining 20.7%. Our PVA glue contains NAUF. We contribute to IE.Q 4.1 Low Emitting Materials (adhesives and sealants.)

Contributing **LEED credits:** IE.Q Low Emitting Materials (composite wood,) MR 7 Certified Wood.

The particleboard core is approximately 79% of the door. The calculation for the **recycled content** is as follows:

- Recycled content = 20% (post-consumer + one half post-industrial.)
- We do not know the post-consumer so we assume it is 0%.
- The post-industrial is 79%; ½ of 79% is 39.5%. Thus, recycled content needs to be 20% but is 0% (post-consumer) + 39.5% = 39.5%.

MR 4.1 requirement is 10%.

MR 4.2 requirement is 20%.

MR 5.2 is as follows:

- Our doors are manufactured at our Riverview plant, located at 1575 Riverview Ave, San Bernardino, CA 92408.
- The stiles and rails are manufactured at our Stockton plant, located at 2651 E Roosevelt St, Stockton, CA 95205.
- The cores are manufactured at Humboldt Flakeboard Panels, 4700 West End Rd, Arcata, CA 95521, or, Timber Products Company, 25 E McAndrews Rd, Medford, OR 97501.
