

# GREEN DOOR

## Sustainability is our goal...

At Haley Bros., we understand that there are many dimensions to sustainability. That's why our **Green Door** is more about than just recycling or healthy indoor air.

Our commitment to the environment extends from our factories right back to the forests that are the ultimate sources for all wood products, and whose preservation is vital for our planet's future.

Interested in green design and construction?

Working on a LEED project?

Interested in conserving energy, making better building material choices, and driving innovation?

Haley Bros. has you covered!

## FSC Certification

The **Green Door** is FSC certified. Haley Bros is proud to support FSC (Forest Stewardship Council) certification because FSC standards address the well-being of forest dependent communities and workers as well as the health and ecological integrity of the forest themselves.

## Recycling and Efficient Use of Resources

The **Green Door** also contains high levels of recycled content. We can stretch limited forest resources by recycling wood as much as possible. The particleboard core and wood frame used in the Green Door contain both wood recycled from mill waste (pre-consumer recycled content) as well as wood diverted from the landfill (post-consumer recycled content.) Equally important, our state-of-the-art manufacturing processes are highly efficient, both in energy and in the wood materials that go in to our doors.

## Indoor Air Quality

The **Green Door** is safe for indoor air quality. Architectural wood flush doors contain many individual components, all of which must be bonded together. Some of these components themselves are made up of wood particles that are bound together by more adhesives. We strictly avoid the use of inexpensive wood binders that contain dangerously high levels of formaldehyde and can off-gas in to interior environments, causing a variety of health problems. That's why our products meet or exceed the latest California Air Resources Board (CARB) IAQ standards- the most stringent anywhere!

The Haley Bros. **Green Door** has numerous environmental features and contributes to multiple LEED credits:

- ✓ Recycled content (MR4.1) (MR 4.2)
- ✓ Geographic dependent (MR 5.1)
- ✓ Geographic dependent (MR 5.2)
- ✓ FSC certified (MR 7)
- ✓ Ultra-low VOC: All adhesives contain no added Urea Formaldehyde (IEQ 4.1)
- ✓ Ultra-low VOC: Low emitting materials; paints/coatings (IEQ 4.2)
- ✓ Ultra-low VOC: Low emitting materials; composite wood (IEQ 4.4)

For more information on the **Green Door**, including the documentation you need to prove LEED compliance, please see our website: [www.haleybros.com](http://www.haleybros.com) or email us at: [info@haleybros.com](mailto:info@haleybros.com)
