

## LEED Credit Categories for Wood Doors

At Haley, we are proud to offer doors that contribute to the overall LEED value of your project.

Each LEED credit is assigned a point value, which is then converted to a dollar value. The total dollar value is calculated and submitted to determine the LEED value of the entire project. It is important that you specify which of the LEED criteria you wish us to comply with in the Haley manufacturing process.

Please note there is no such thing as a LEED certified door, nor can we apply a LEED stamp on the door, as no one else can.

The following outlines the LEED point system, and how each LEED criteria may assist you and your clients to achieve LEED certification for their project.

<b>MATERIALS AND RESOURCES: Recycle Content (1-2 Points), Local/Regional Materials (1-2 Points)*, Rapidly Renewable Materials (1 Point), Certified Wood (1 Point). *Qualification for LEED credit MR5.1 is required to qualify for MR 5.2.</b>				
<b>LEED CREDIT</b>	<b>LEED CRITERIA</b>	<b>FLUSH DOOR CORE</b>		
Materials and Resources	Door Construction	Particle Board LD1, LD2	Stave Lumber	Mineral Core
MR 4.1	Recycled content (5% post-consumer or 10% post-consumer + post-industrial content)	Yes		
MR 4.2	Recycled content (10% post-consumer or 20% post-consumer + post-industrial content)	Yes		
MR 5.1	Regional Materials (20% manufactured regionally)	Yes	Yes	Yes
MR 5.2	Regional Materials (50% extracted and manufactured regionally)	Yes	Yes	Yes
MR 7	Certified wood (note: MR 7 FSC certified wood. Haley doors qualify for 80% mixed use credit.)	Yes FSC Certified	Yes FSC Certified	
<b>INDOOR ENVIRONMENTAL QUALITY: Low-Emitting Materials (1 Point)</b>				
IEQ 4.1	Low-emitting materials (adhesives and sealants) (Ultra-low VOC. Emitting materials)	Yes	Yes	Yes
IEQ 4.2	Low-emitting materials (paints and coatings)	Yes	Yes	Yes
IEQ 4.4	Low-emitting materials (composite wood)	Yes	Yes	Yes
<b>INNOVATION AND DESIGN PROCESS: Innovation and Design (1-4 Points)</b>				
<b>NOTE: When it comes to architectural doors, the specifier is responsible for the election of LEED categories and LEED point accumulation.</b>
