

Quality Crafted Architectural Flush Doors

Sustainability is our Goal

At Haley Bros., we understand that there are many dimensions to **sustainability**. Our manufacturing element is more about than just recycling or healthy indoor air. Our commitment to the environment extends from our factories right back to the forests that are the ultimate sources for all wood products, and whose preservation is vital for our planet's future.

Recycling and Efficient Use of Resources

Our architectural doors also contain high levels of recycled content. We can stretch limited forest resources by recycling wood as much as possible. The particleboard core contains both wood recycled from mill waste (pre-consumer recycled content) as well as wood diverted from the landfill (post-consumer recycled content.) Equally important, our state-of-the-art manufacturing processes are highly efficient, both in energy and in the wood materials that go in to our doors.

NAUF-Indoor Air Quality

We strictly avoid the use of inexpensive wood binders that contain dangerously high levels of formaldehyde and can off-gas in to interior environments, causing a variety of health problems. That's why our **NAUF (No Added Urea Formaldehyde)** products meet or exceed the latest Cal Green and California Air Resources Board (CARB) IAQ standards- the most stringent anywhere.
